

Analysts Say Global Credit Crisis Imminent

By T.W. Tramm

MORE and more analysts are warning that a financial crash is imminent.

An indication that the looming crash may be “biblical” in scale is the date on which the market volatility began: Tishrei 1 (the first day of the 7th biblical month), corresponding to October 10 (the 10th day of the 10th Gregorian month), exactly 10 years after the last major market crash on Tishrei 1, 2008.*

How are these dates and numbers significant?

God works to patterns. Tishrei, the month of the shemithah and jubilee “release” in Scripture, is historically associated with major stock market plunges, most recently consecutive crashes on Tishrei 1 in 2001 and 2008.

Additionally, God is about numbers. The particulars of prophetic events, dates, timespans, etc., often bear His signature in numerical form. A relevant example is that the historic stock crash at the start of the 7th month in 2008 saw a Dow point drop of exactly 777 points.

Seven is the number of completion and perfection in Scripture. From the seven-day week in Genesis to the Book of Revelation, where there are seven churches, seven angels, seven seals, and seven trumpet-plagues, seven represents fullness or completeness.

The number 10 signifies God’s omnipotence and is associated with the judgment of the pagan/Gentile world: In the first chapter of Genesis the phrase “God said” appears 10 times. In the Book of John Jesus uses the phrase “I am” 10 times. There are 10 Commandments, linking the number 10 to God’s sovereignty or dominion. Ten generations of man lived on the earth before the Flood was sent. The last world-ruling kingdom under Satan is symbolized prophetically by 10 toes and 10 horns (Dan. 2; Rev. 13, 19). The Lord sent 10 plagues on Egypt, representing the complete judgment of the pagan empire.

The numbers 7 and 10 multiplied equal 70. The number 70 is linked to the culmination of God’s plan of redemption: Daniel’s prophetic timeline consists of 70 weeks (9:24-27). A typical human lifespan is 70 years (Ps. 90:10; Matt. 24:32-34). The Jews were redeemed from Babylon after 70 years (Jer. 29:10). The significance of the numbers 7 and 10 in Scripture make the start-time of the market volatility seem uncanny: the start of the 7th (biblical) month and the 10th day of the 10th (Gregorian) month in the 10th year since the last crash.

As we highlight here often, the economy is a crucial piece of the prophetic puzzle as Scripture emphasizes that the Day of the Lord begins during a time of economic expansion, when people are

buying, selling, building, and planting (Luke 17:26-29). If the predictions of some experts are correct and we're seeing the beginnings of an unprecedented and world-changing economic crash, how near must the return of the Lord be?
